Technical Tour of Tunnel Construction and Underground Excavation projects and Equipment in Germany and Switzerland

In line with Pezhvac Company's goals, an 8-day technical tour of tunnel construction and underground excavation sites has been conducted from Dec. 1 to Dec. 8 2015 in Germany and Switzerland to familiarize Iranian senior managers and technical experts in the country's civil industry with the most advanced technology in the field, thereby helping the transfer of the industry's modern day technology into Iran.

In this technical tour, 20 Iranian deputy governors and managers of Inner-city train organizations visited the ongoing projects in ILF and Herrenknecht companies, as well as Herrenknecht Company's factory. These visits took place in Germany's Karlsruhe and Zurich-- Switzerland's global financial hub. Other programs during this technical tour included participating in STUVA Conference 2015 in Dortmund and a visit of the Emscher River water tunnel project.
