Research \& Innovation Co.

Visit report of poultry feed and equipment companies in France, Belgium and The Netherlands:

In line with the scopes of Pezhvac Company on technology transferring, and to make state and private managers familiar with the most updated technological outcomes, we arranged visits to pioneer companies of poultry and related feed and equipment production in France, Belgium and The Netherlands. Started from February 11 in France and terminated in February 18 in The Netherlands. 29 state and private managers had technical visits to feed production sites, equipment manufacturing lines as well as hatchery and participated in presentations in Vencomatic group, Inve Belgie, Institute of poultry in Belgium, Blgabroad Hatchery, Nukamel Production B.V and, Jansen Poultry Equipment companies. The cities hosting the visits were Paris in France, Brussels, Geel and Merksplas in Belgium as well as Weert, Eersel, Barneveld and Amsterdam in The Netherlands.

# Vencomaticgroup <br> Vencomatic Group <br> Agro Supply - Prinzen - Vencomatic <br> Vencomaticgroup 

Company Name

## Company Location

Eersel, The Netherlands

## Visit Venue <br> Venco Campus

The Vencomatic Group is owned by Cor and Han van de Ven from Eersel, the Netherlands. It started over 30 years ago, in 1983, with Cor's breakthrough innovation for breeder housing: the first automatic breeder nest. In 2004 Vencomatic started combining the last phase of incubation and hatching of broilers

Area of<br>Specialization on the farm. In 2006 Vencomatic introduced the Patio system in which on-farm hatching is integrated as a standard. With the X -Treck concept on-farm hatching will also be possible in floor houses. Setter trays with 18 day-incubated eggs are placed on a rail system. This rail system is suspended and positioned freely in the air, ensuring an optimal airflow surrounding the eggs during hatching

Company

## Location

## Visit venue

INVE BELGIE NV is a Belgian company active in the animal feed sector. The company specialises in the development, the manufacturing and the sales of concentrates, premixes, additives and nutritional ingredients. FAST (For Active Stimulation of Tractus) is an early feeding concept for one-day-old chicks Area of developed by INVE België NV focusing on two major goals:
Visit venue Inve production line
(Dendermonde)

Inve production line
(INVE België)

#### Abstract

enhancing feed intake shortly after chicks are hatched or arrive in the poultry house and stimulating the development of the intestinal tract. Highly digestible proteins, different types of carbohydrates and fibers, additives supporting the bird's immunity and ability to digest the alimentary fat are brought together in a unique mixture of a cold-pressed granulate and a meal fraction.

(Antwerpen)

Visit Venue
Our test houses to meet the increasingly stringent requirements for laying hens and broilers. We've built to conduct research tailored to the farmer in the field. Our stables are admittedly smaller but for research purposes, the test groups are large enough to be of statistical value. Our hens stall has a total capacity of 31,000 laying hens. They are divided into three different housing systems: two aviaries and one with enriched cages. Each system has four test sections, which allow to play with settings for feed, water and climate, and to compare them. Our three broiler houses have a combined capacity of about 44000 chickens. Two existing houses each have 12000 animals spread over two environment departments.

destrooper\&moonen

Company Location
Belgabroed
Company Name Belgabroed

Merksplas

Visit Venue
The business are true family companies that, through collaboration, have achieved a pioneering role within the poultry market in north-west Europe. Since we all work in the same sector, we constantly push each other's performance to a higher level. The group stands for more than 80 years of experience, the right combination of young and experienced, motivated workers. Belgabroed is a company with the capacity of 1.4 million broilers a week and employing 45 people, Belgabroed is the largest hatchery of day-old chick in Belgium. The hatching eggs are sourced from certified production companies. Using a selfdeveloped IT system, all eggs are traced until the rearing process.

## Nukamel

Nukamel
Company Name Nukamel
Company location Weert

## Visit venue

Conference center of Antje van de Statie
And Nukamel production line

The world's poultry demand has continuously risen in the last decades. Chicken meat output accounts for some 88 per cent of the world's poultry meat production. Improved genetics, more attention to health and good management, and, an advanced way of feed formulation, have lead to extreme growth rates.

Area of Specialization Approximately $85 \%$ of the total production cost of broilers is attributed to the cost of feeding; So, feed efficiency and health are extremely important for the economical viability of broiler farms.In that respect, Nukamel also offers specific products for poultry, supporting digestibility and growth. As is the case for young calves or piglets, young birds have specific needs. Ensuring an optimal start for the young broiler or the young turkey is a prerequisite to make full use of its genetic potential.
